REPORTER'S TRANSCRIPT OF
GRAND JURY PROCEEDINGS

Wednesday, November 13, 2013
Globe, Arizona

REPORTED BY: GLINDA FABOK, AZ-CR#50277

1 MR. FULLER: At this point, do any members of the grand
2 jury have any factual questions for Detective Van Camp? Yes,
3 sir.

4 JUROR: Did the doctor have him on some kind of
5 medications that would make him ~~crazy~~ like that?

6 THE WITNESS: I don't know of any medications Mr. Voden
7 takes for any mental type condition.

8 CLERK: Well, obviously he takes medicine for his
9 heart.

10 THE WITNESS: He told me he had to go take some
11 aspirin, is what he actually had to go take.

12 MR. FULLER: Yes, ma'am.

13 JUROR: Had he been drinking or taking any form of a
14 drug?

15 THE WITNESS: No. Mr. Voden does not take any drugs or
16 alcohol, he told me.

17 MR. FULLER: Yes, sir.

18 JUROR: Was there actually, in fact, blood on the gun
19 and his hands?

20 THE WITNESS: Yes.

21 JUROR: There was. Okay. So it probably would be
22 pretty close?

23 THE WITNESS: Well, as of this time, I haven't
24 determined exactly how the gun got blood on it, or his hands
25 being that the victim and him never had any physical contact.

1 Mr. Voden doesn't recall ever touching the victim or anything
2 after the shooting of how he possibly could have gotten blood
3 on his gun or him.

4 MR. FULLER: Yes, ma'am.

5 JUROR: On the 911 call he said his arm was twitching.
6 Do you know which arm he was complaining about?

7 THE WITNESS: No, I don't know what that is. He
8 discussed in my interview with him how his right hand doesn't
9 close real well, only when it really needs to. When he was
10 talking to me of how he was holding the gun and showing me how
11 he had the gun straight out with one hand. So that's the only
12 thing he talked about with his arm.

13 MR. FULLER: Yes, ma'am.

14 FOREPERSON: How far away was he for maybe blood
15 splatter or?

16 THE WITNESS: Well, the exact distances is really
17 unknown at this point. There's physical evidence that would
18 suggest that the distance that Mr. Voden talked about, three to
19 six feet at the beginning of the shooting would be pretty
20 close, pretty accurate, because if you take into account of
21 physics of a person walking towards another one. So there is a
22 possibility that after the initial gunfire that the two of them
23 did come together. ~~Maybe the victim fell on the suspect.~~

24 Those are unknowns. There's no camera. There's no witness
25 ~~of that occurring, and Mr. Voden, himself, does not remember~~
